

What to do if your child has symptoms of coronavirus

The main symptoms of coronavirus are:

- a high temperature
- a new, continuous cough – this means coughing a lot, for more than an hour, or 3 or more coughing episodes in 24 hours
- a loss or change to sense of smell or taste – this means they cannot smell or taste anything, or things smell or taste different to normal

Use the 111 online coronavirus service if your child is 5 or over. Call 111 if they're under 5.

What to do if your child seems very unwell

Children and babies will still get illnesses that can make them very unwell quickly. It's important to get medical help if you need it.

Urgent advice: Call 111 or your GP surgery if your child:

- is under 3 months old and has a temperature of 38C or higher, or you think they have a fever
- is 3 to 6 months old and has a temperature of 39C or higher, or you think they have a fever
- has other signs of illness, such as a rash, as well as a high temperature (fever)
- has a high temperature that's lasted for 5 days or more
- does not want to eat, or is not their usual self and you're worried
- has a high temperature that does not come down with paracetamol
- is dehydrated – for example, nappies are not very wet, sunken eyes, and no tears when they're crying

The new antibody test - This test is not suitable for diagnosis of acute infection.
